

UI/UX Personal Project

- Create a personal brand identity that showcases my skills, experience, and values.
- Develop a clear and concise homepage that quickly informs the user who I am and what I do.
- Showcase my portfolio of work with detailed case studies and explanations of my process.
- Provide a blog section that shares my thoughts on industry trends, technologies, and personal experiences.
- Use a clean and modern design that is easy to navigate and visually appealing.
- Ensure that the website meets WCAG2 accessibility guidelines.
- Make sure the website is mobile-responsive to accommodate users on various devices.
- Include a section that highlights my skills and technical abilities.
- Implement a contact page that makes it easy for potential employers to get in touch with me.
- Provide social proof through testimonials, awards, and recognition.
- Create a seamless user experience that caters to the needs of my target audience (employers, developers, etc.).

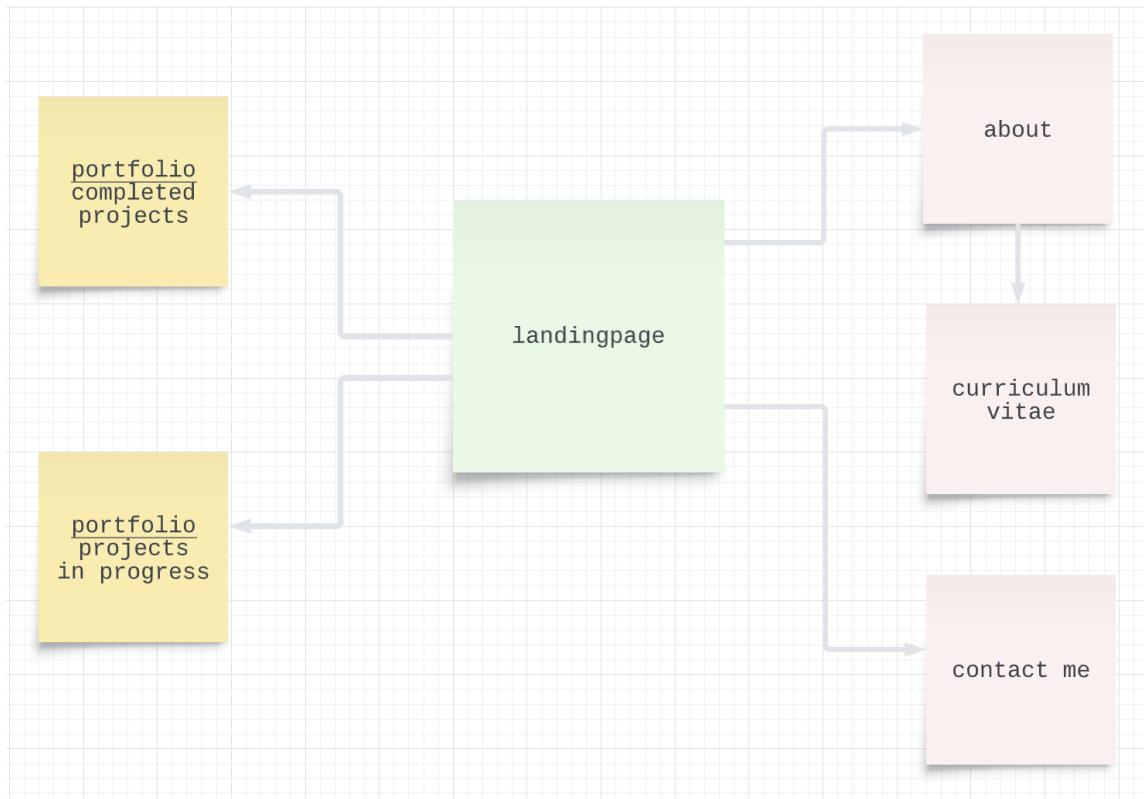

Thoughts

- 1** Following Design Thinking Process and UX/UI planning:
 - ~~Create user personas and user stories to identify who will be using the app and what needs it will fulfil.~~
 - Add personas and stories to repo.
 - Design for accessibility

- 2** Plan and create wireframes in Figma. Downloaded or screenshot and add to repo.

- 3** Create high-fidelity design that looks like the end-product. Commit to repo.
